Education

B.Tech (Computer Science and Engineering)

Brainware University, Kolkata

August 2023 – August 2027 (Expected)

CGPA: 9.4 / 10 (Upto 6th semester)

Science with PCMB 12th Boards

Nebadhai High School, Duttapukur

WBCHSE

Percentage: 92%

Degree in 10th Boards

Nebadhai High School, Duttapukur

WBBSE

Percentage: 94%

Experience

Project Research Intern

Indian Institute of Technology Bombay (IIT Bombay)

January 2026 – June 2026

Mumbai, India

- Conducting research in transportation and mobility analytics using econometric, statistical, and behavioral modeling techniques on large-scale survey datasets.
- Built and processed research datasets using **Python, R, Pandas, NumPy, and Excel**, including data cleaning, preprocessing, missing value imputation, and feature preparation.
- Implemented econometric and causal inference models including **Difference-in-Differences (DID)**, **Staggered DID** and logistic regression for policy evaluation and behavioral studies.
- Developed automated Python web scraping pipelines for collecting, organizing, and validating multi-source research data used in downstream statistical analysis.
- Collaborated with research mentors on data-driven analysis, model validation, and interpretation of results for ongoing academic research projects.

Skills

Programming Languages: C, Java, Python, JavaScript

Frontend: HTML, CSS, SCSS, Tailwind CSS, React.js

Backend & Databases: Node.js, Express.js, REST APIs, Mongoose, MongoDB, PostgreSQL, Redis

Tools / Platforms: Git, GitHub, Postman

Projects

CropShield AI – Intelligent Agronomy Platform | *Live Demo* | *GitHub*

- Built an AI-powered agronomy platform using **React and Google Gemini API** for pest detection, crop guidance, and yield-related insights.
- Developed “Kisan Mitra,” a multilingual real-time voice assistant using the **Gemini Multimodal Live API** with low-latency PCM audio streaming.
- Implemented geolocation-based weather synchronization and multilingual support (English, Hindi, Bengali) to improve accessibility for farmers.

AI-Powered Code Reviewer | *GitHub*

- Developed a web-based platform that analyzes user-submitted code and generates AI-based review feedback.
- Built REST APIs using **Node.js** and **Express.js** for code submission and review workflows.
- Designed a responsive frontend using **React** with syntax highlighting and interactive review features.

Awards & Certifications

- **Theme Award – Sustainability, SBI College Youth Ideathon at IIT Delhi (2025):** Selected among Top 100 teams out of 15,000+ ideas submitted by 44,000+ students nationwide; won the Theme Award for Food Saviour after multi-stage evaluation by IIT Delhi, MEPSC, and ThinkStartup.
- **Top 30 Finalist – STPI x Techniche Entrepreneurship Hackathon, IIT Guwahati (2025):** Shortlisted among the Top 30 teams in a national entrepreneurship hackathon hosted under Techniche, the annual techno-management festival of IIT Guwahati.
- **NPTEL Certified – Problem Solving Through Programming in C (2024):** Completed NPTEL certification course by Prof. Anupam Basu, focused on structured programming and algorithmic problem solving.
